PROFILE

Senior Product Manager with 12+ years of experience across enterprise SaaS, AI/ML platform products, and cloud infrastructure, including 3 years of formal PM ownership at JPMorgan Chase. Defined and shipped AI-first products 0-to-1 — from agentic orchestration platforms to real-time enterprise intelligence engines monitoring \$200B+ in annual transaction volume — securing Managing Director sponsorship and driving delivery across 7 scrum teams (50+ engineers). Translates ambiguous enterprise problems into scalable, prioritised roadmaps that connect product decisions to measurable customer and business outcomes. Builds and ships agent-driven AI systems personally; CSPO and PMP certified.

SKILLS

Product and Delivery: Enterprise SaaS Product Management, Product Vision and Strategy, Roadmap Ownership, 0-to-1 Product Conception, PRD and Epics, Business Case Development, Platform Adoption, OKR-driven Delivery, Agile/Scrum, Cross-functional Leadership

AI and Platform: AI-first Product Strategy, Agent-driven Enterprise Products, Agentic AI, Multi-agent Orchestration, Scalable System Design, ML Decisioning, RAG (Retrieval-Augmented Generation), Anomaly Detection

Technical: AWS (EC2, S3, Lambda), GCP (BigQuery, Dataflow, Cloud Storage), Azure, SQL, Tableau, Python, TypeScript, JIRA, Confluence, Figma

Domain: Enterprise SaaS, Cloud Platforms, Data Governance, Financial Services, Regulatory Compliance, Developer Platforms, API and SDK Products

Certifications: CSPO (Scrum Alliance, 2024) | PMP (PMI, 2020)

EXPERIENCE

JPMorgan Chase and Co.

Hyderabad, India | Sep 2023 – Present

Product Manager, ATM Channel and Home Lending

- Owned product vision, strategy, and roadmap for 4 AI-first enterprise products with no prior mandate — authored business cases from first principles, secured Managing Director sponsorship, and drove quarterly roadmap reviews across 7 scrum teams (50+ engineers) aligned to OKRs.
- Shipped a real-time AI intelligence platform on AWS monitoring hardware, transaction, and data health signals across 16,000+ ATM endpoints processing \$200B+ in annual transaction volume; translated customer scenarios from L3 support and operations into detection logic, alerting thresholds, and API specifications.
- Shipped an AI cash optimisation engine applying ML decisioning to ATM replenishment scheduling; validated decisioning thresholds with data science, finance, and operations stakeholders, cutting replenishment cycles by ~20% and targeting tens of millions in annual cost avoidance.
- Co-designed output specifications for an automated credit qualification model serving a \$40B+ origination portfolio, translating complex ML outputs into underwriter and advisor decisioning scenarios; reduced application turnaround by ~40%.
- Delivered a cloud-native HMDA regulatory automation product on Encompass SaaS, coordinating 3 scrum teams (18 engineers) to cut manual data review by ~60% across 100,000+ annual loan records with 100% federal compliance.
- Designed and shipped an AI-powered PM productivity platform integrating business case discovery, assumption testing, and financial modelling; deployed to 11 team members with an organisation-wide scale roadmap.

Accenture

Hyderabad, India | Jun 2021 – Aug 2023

Product and Strategy Consultant

- Delivered a scalable GCP enterprise data platform (BigQuery, Dataflow, Cloud Storage) consolidating 10+ legacy sources and migrating ~5–10 TB of data for a global media enterprise; cross-functional team of 8–12, on time and within scope.
- Defined product requirements and drove enterprise SaaS adoption for an ML-based Next Best Action engine for a Fortune 500 media client, delivering measurable subscriber growth and churn reduction with CXO-level recognition for commercial impact.

Wipro

Pune, India | Feb 2018 – May 2021

Product and Strategy Analyst

- Led 8 enterprise transformation programmes for Communications, Media, and Technology clients, designing scalable operating models and SLA frameworks driving ~25–30% operational cost reduction; promoted within 2 years.

OYO Rooms

Hyderabad, India | 2016 – 2018

Head of Business Development, Supply

- Expanded supply inventory across 4 cities with a team of 5, renegotiating high-value partner contracts to restore market profitability and grow unit share.

TECHNICAL PROJECTS

- **AI Enterprise OS** (TypeScript, JavaScript | github.com/enigmaicon-eng/AI-Enterprise-OS): Designed and prototyped a multi-agent enterprise orchestration runtime with graph-native memory infrastructure, runtime governance, and adaptive compliance layers — directly addressing agent coordination, scalable system design, and enterprise AI platform challenges central to next-generation SaaS products.
- **Enterprise Intelligence Workspace** (Python | github.com/enigmaicon-eng/Enterprise-Intelligence): Built an agent-driven RAG execution environment applying persistent episodic and semantic memory systems to enterprise PM workflows; demonstrates hands-on AI-first product thinking and agentic system design beyond standard PM tooling.

EDUCATION

PGDM, Marketing and Communication | MICA, Ahmedabad | 2014–2016

B.E., Electronics and Telecommunications | JNTU Hyderabad | 2007–2011

CERTIFICATIONS

- Certified Scrum Product Owner (CSPO) | Scrum Alliance | 2024
- Project Management Professional (PMP) | PMI | 2020
